MPREIS, KLAGENFURT

MPREIS stands for regionality, sustainability and excellent design. The new market in the Carinthian state capital is a prime example of this. Typical of MPREIS is the combination of elegant appearance and functional design, which does not ignore aspects such as energy efficiency and renewable raw materials. The lightweight building is extremely energy-efficient, and a photovoltaic system on the roof produces its own electricity.

The approach during planning and construction was to create a relaxed atmosphere. The PICHLER ventilation system ensures maximum comfort and fresh air in the supermarket. With a highly efficient heat recovery system with air / air counterflow heat exchanger, heat losses are avoided. The needs-based ventilation control is tailored to the activity of people with strongly changing customer frequencies.

In addition, the PICHLER fire dampers reliably ensure maximum safety in the event of a fire.

DATA & FACTS

Location: Klagenfurt am Wörthersee

Completion: 2021

Type of building: supermarket

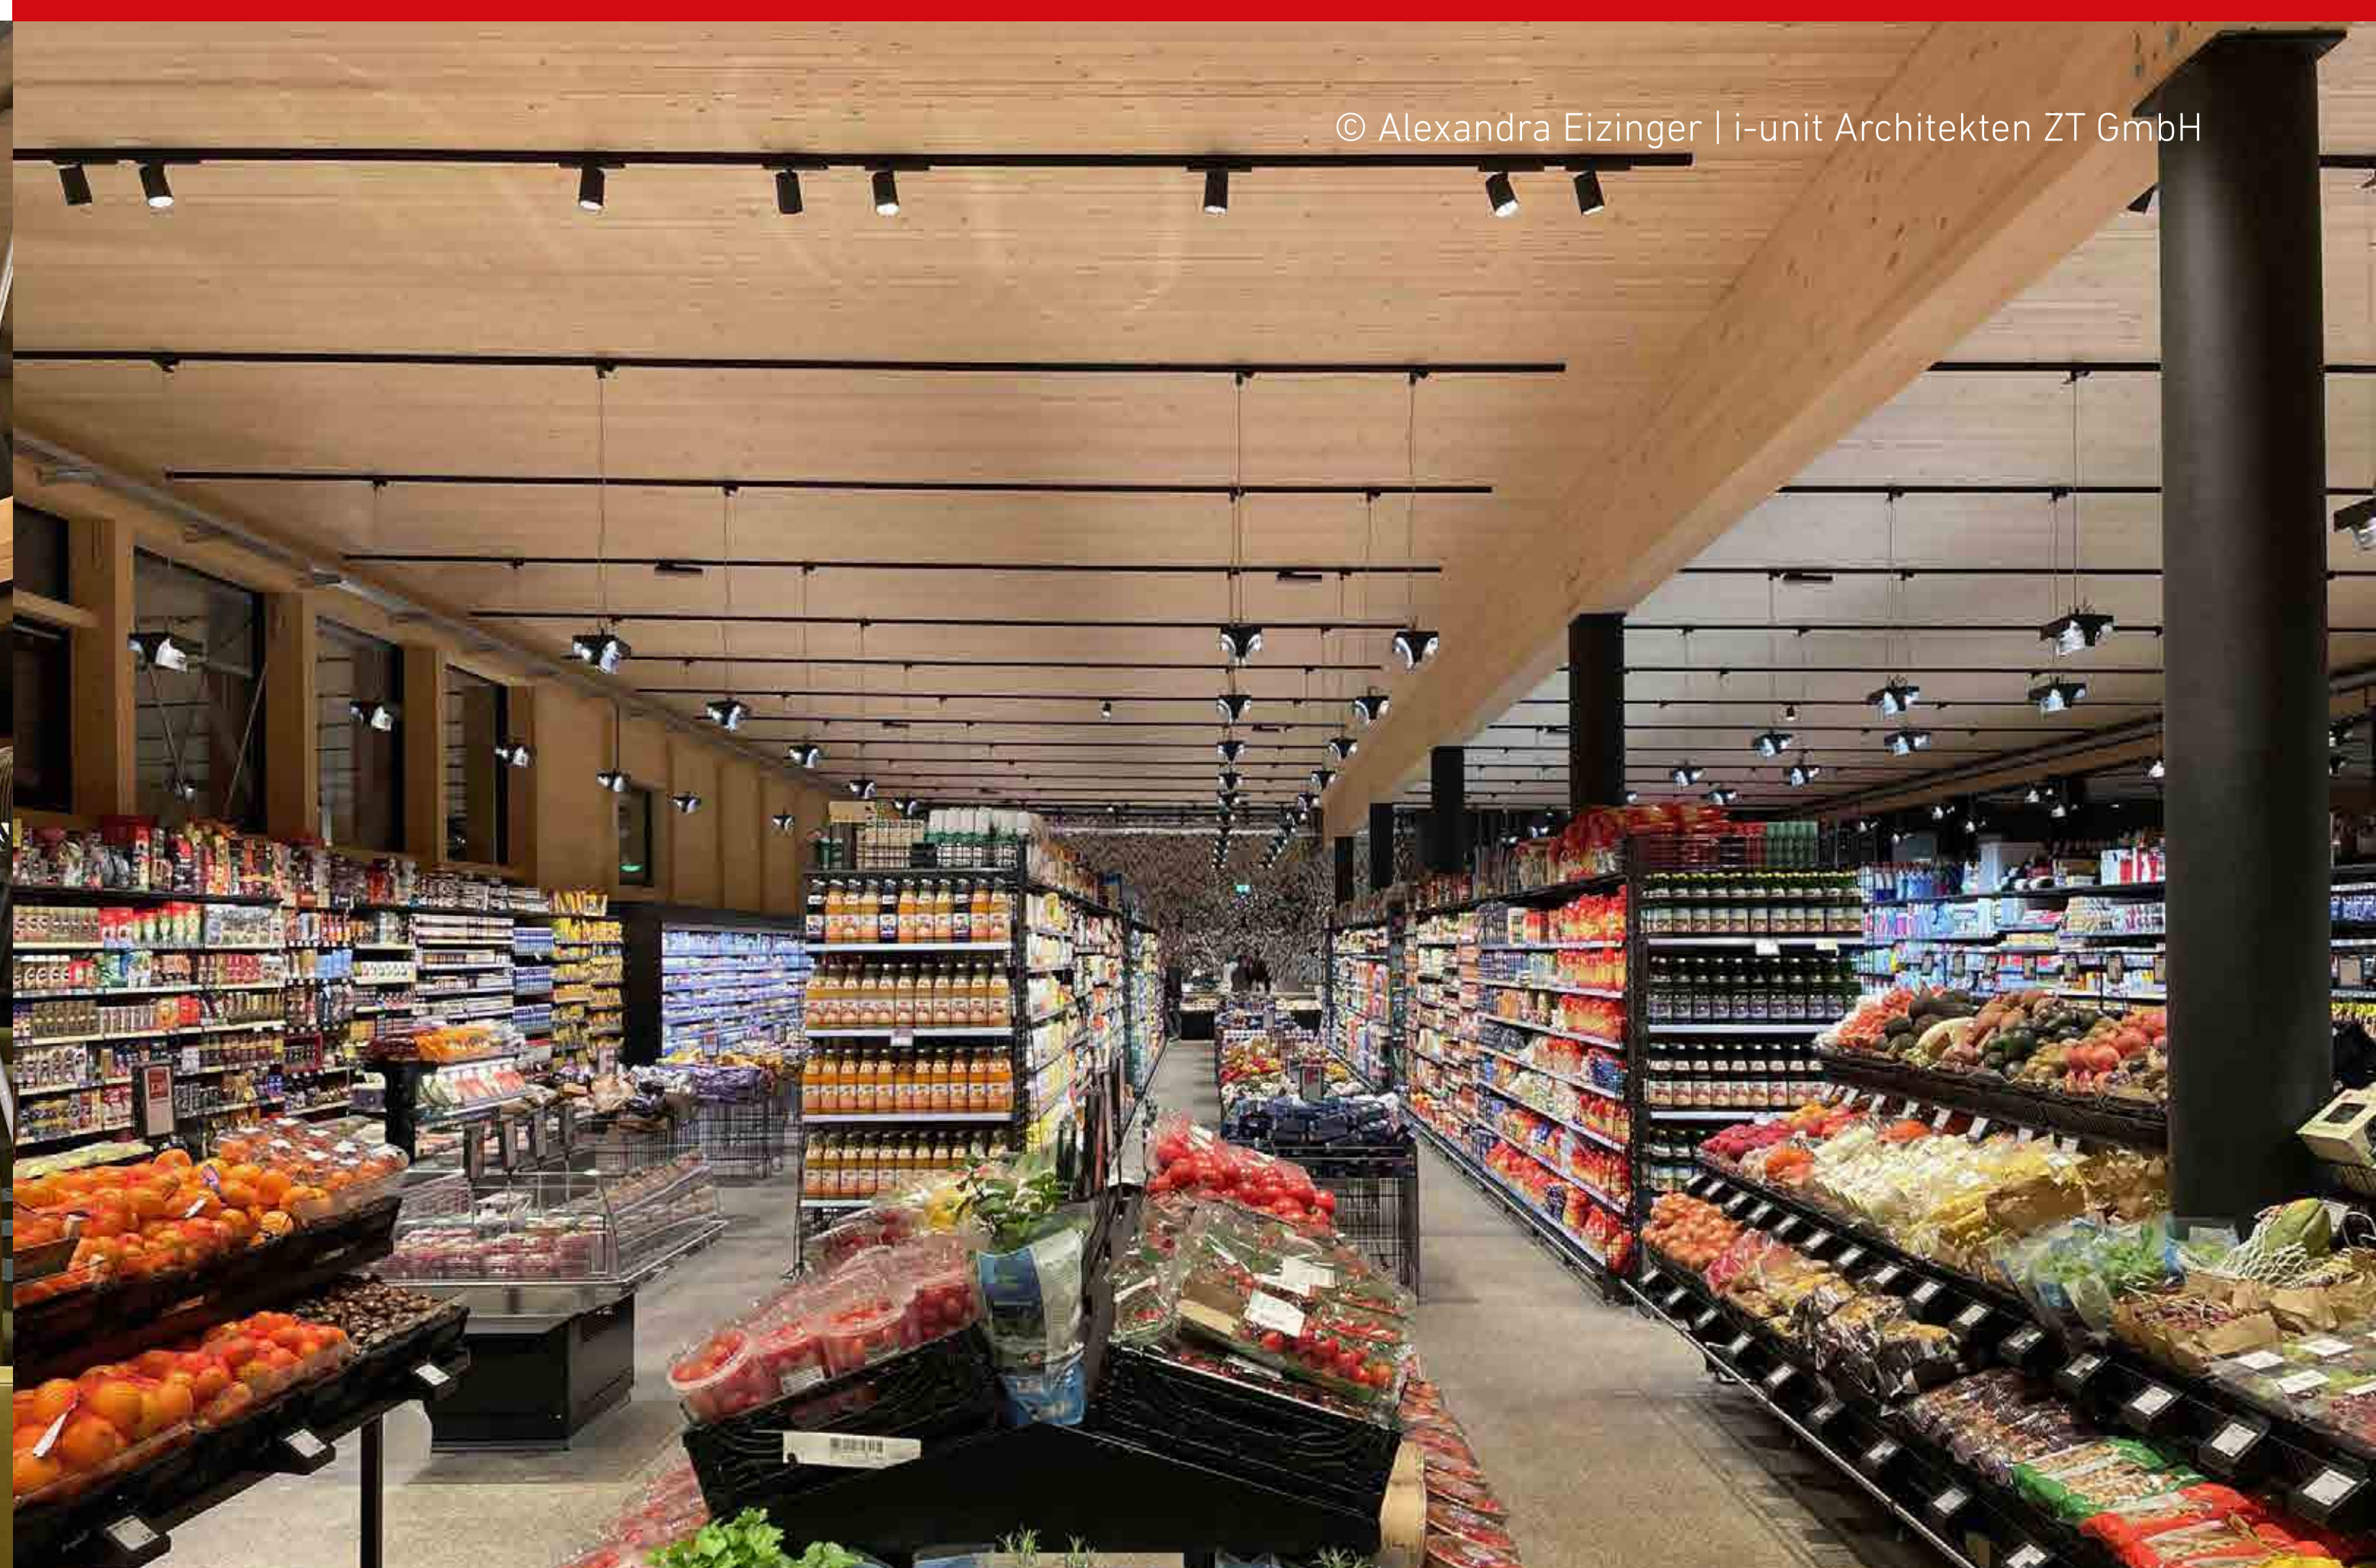

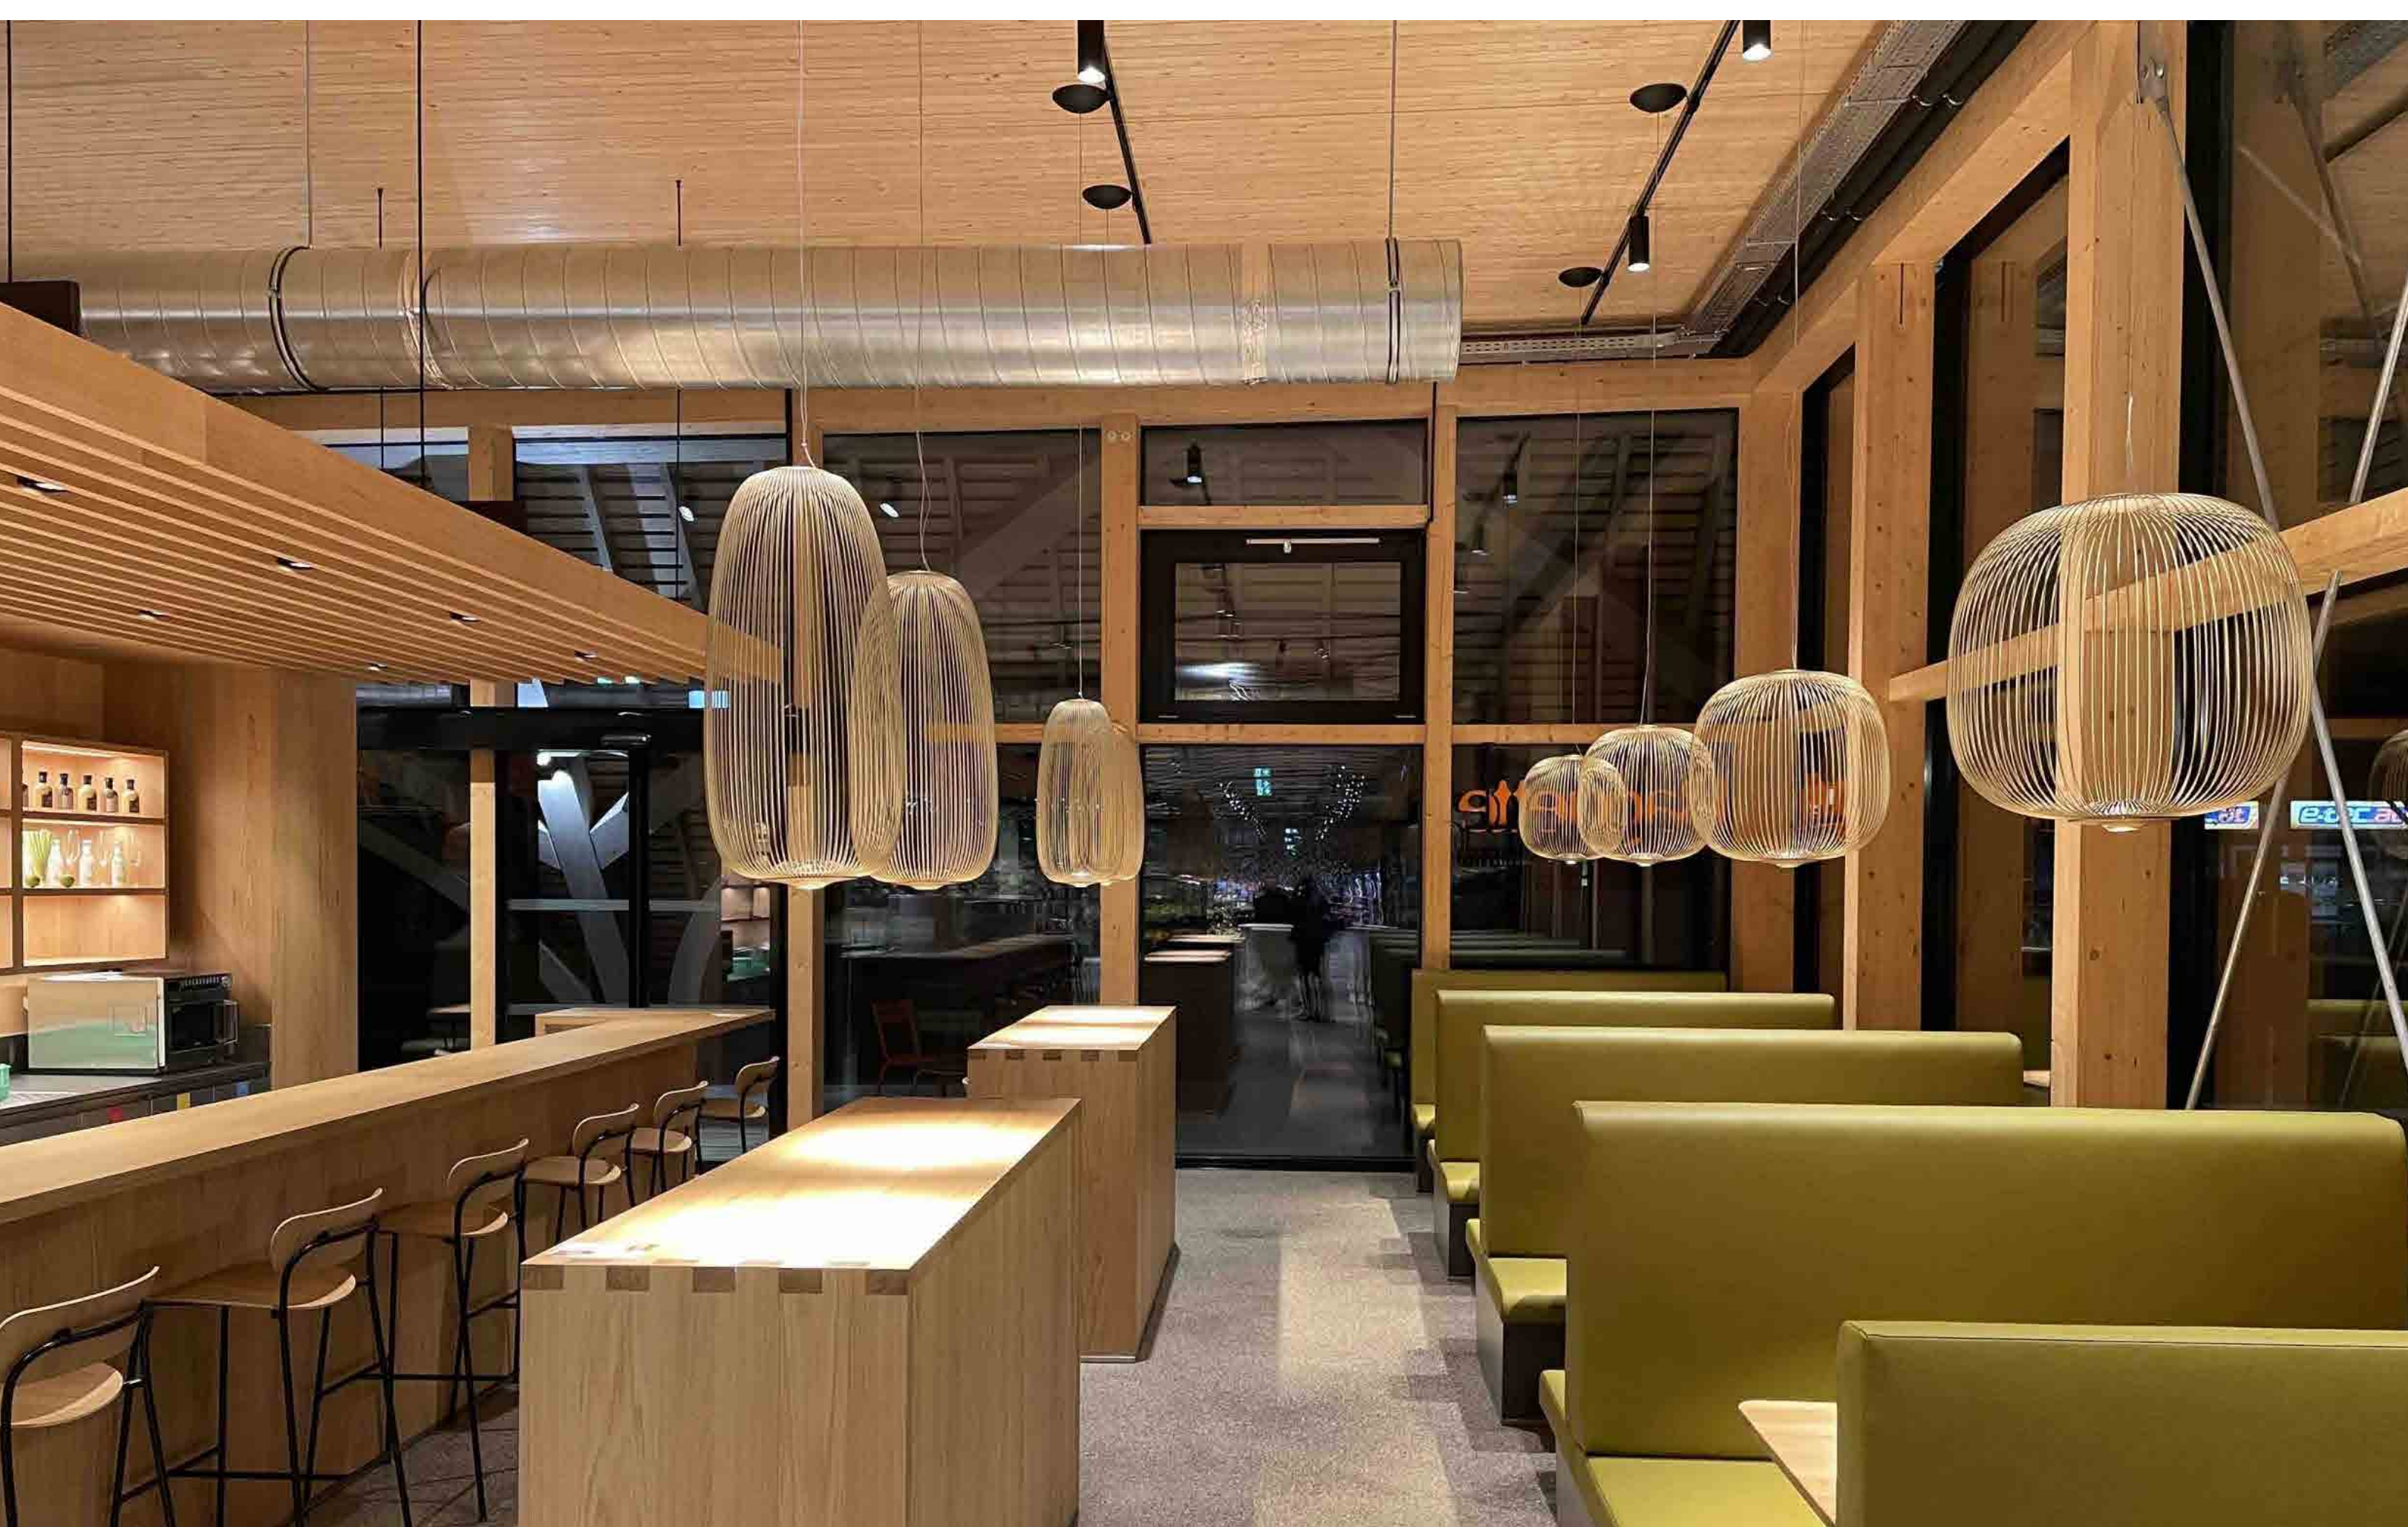

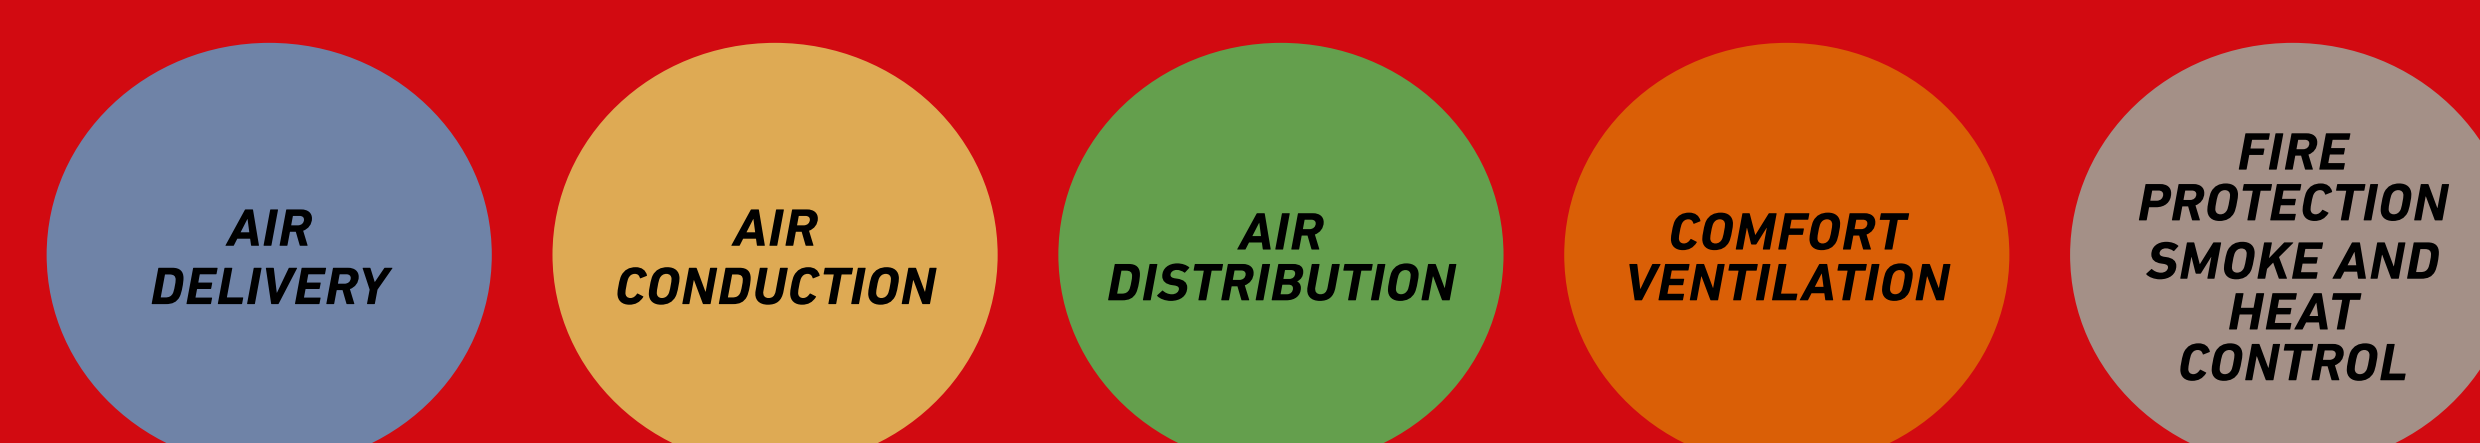

Builder: MPREIS Warenvertriebs GmbH, Völs

Architect: i-unit Architekten ZT GmbH

Building technology: Markus Stolz GmbH & Co KG

Products: centralized ventilation unit PICHLER LG 2500, centralized ventilation unit Domekt CF 700, fans, sound absorbers, ventilation grilles, fire dampers, weather protection grilles, spiral ducts, channels & fittings

Product groups:
